INTRODUCTION

The Career Services Center of Philadelphia University is pleased to present its Senior Survey for the Class of 2013.

This survey includes students with graduation dates of August 2012, December 2012 and May 2013. Statistics are derived from a survey collection pool of **410** from a total graduating class of 553 (representing a 74% response rate). Response sources include: self-reported survey responses, faculty/staff outreach, and LinkedIn profile verifications. Of the **410** responding graduates, **386 or 94%** have reported post-graduation employment in fields related to their major or career interests or graduate school acceptance. Employment plans were reported by **326 or 79%** of graduates. Graduate school plans were reported by **60 or 15%** of graduates. The remaining **24 or 6%** indicated they were still seeking employment at the time of this report.

Factors that contribute to this success include the talents of our students, their high-quality academic preparation, faculty and alumni networks, recognition we attain from numerous regional and national employers, the provision of a comprehensive array of experiential education opportunities, career-development services and programs, and the effective job and graduate school searches conducted by our students. This success translates into a range of starting salaries from **\$24,000-\$60,000** with a reported average salary of **\$40,000**. Where no or insufficient salary data were reported to calculate an average, NR (Not Reported) is indicated.

The Career Services Center assists students with their career and professional development, offering opportunities to prepare for their internship & job search and connect with industry representatives. Programs, services and workshops available to students in the past academic year include:
